ACKNOWLEDGEMENT

First and foremost I would like to thank the Lord Almighty for His presence and immense blessings throughout the project work.

I would like to thank my teacher, Dr. Kannan for guiding and giving valuable suggestions to complete the project work.

I wish to express my heartfelt gratitude to Respected Authorities of School of Computer Science and Engineering for much of their valuable support encouragement in carrying out this work.

Last, but not least, I am deeply indebted to my parents and peers who have been the greatest support while I worked day and night for the project to make it a success.

DIGITAL LITERACY PORTFOLIO: STUDENT AMBASSADOR PROJECT

TASK 1

Digital Literacy Awareness Infographic

Tool used:

For this task, I created a digital literacy awareness infographic using Canva. The infographic highlights key aspects of digital literacy such as safe internet practices, useful digital tools for students, and the importance of maintaining a professional online presence. I designed it in a simple and visually appealing way using icons, headings, and short bullet points to make it easy to understand.

Design depiction:

The infographic explains what digital literacy is, useful digital tools for students, safe internet practices, professional online presence, also emphasizing cybersecurity practices such as using strong passwords and avoiding suspicious links. I chose Canva because it provides ready-made templates and design elements that make the process simple even for beginners.

One difficult or interesting thing:

One challenge I faced was selecting the most important information without overcrowding the design. However, this helped me learn how to present information concisely and effectively. Overall, this task improved my ability to communicate ideas visually.

TASK 2

Building Student Digital Portfolio

Platforms chosen

For this task, I created and updated my profiles on GitHub, LinkedIn, and Kaggle to build a professional digital portfolio.

GitHub is used to showcase projects and coding work, LinkedIn helps in building a professional network, and Kaggle allows me to practice tools for data professionals.

On GitHub, I created a profile README that includes my name, branch, and learning goals. On LinkedIn, I updated my education details and created a basic professional profile. I found it interesting to see how these platforms allow students to present their skills and achievements online.

Their Utility:

These platforms are important because recruiters and internship coordinators often review them before shortlisting candidates.

Plan to use them over the next four years:

Over the next four years, I plan to regularly update my GitHub with projects, connect with professionals on LinkedIn, and improve my problem-solving skills on Kaggle. This will help me build a strong digital presence and improve my career opportunities.

This task made me realize the importance of maintaining a professional online identity.

TASK 3

Exploration of Coding & Collaboration Platforms

- Part A – Coding Practice
- Part B – Google Workspace Collaboration

For this task, I explored both coding and collaboration platforms. I completed a beginner-level problem on HackerRank, which helped me understand how coding platforms work and how they improve problem-solving skills. I found HackerRank especially interesting because it provides real-time feedback and encourages continuous practice.

Additionally, I created a Google Form titled “Digital Literacy Awareness Quiz” consisting of five questions, including multiple-choice and short-answer questions. I also linked the form to a Google Sheet to view responses. This helped me understand how data collection and analysis work in real-time.

These tools are very useful academically. Coding platforms help improve logical thinking and programming skills, while Google Forms can be used for surveys, quizzes, and collecting feedback. Overall, this task gave me practical exposure to online tools and showed how they can be effectively used in academic work. I will continue using these platforms to improve my skills over time.

TASK 4

Professional email and Etiquette Guide

- Part A – Professional email drafting

Email 1: Requesting an Extension on an assignment submission deadline.

Subject: Extension Request: Digital Literacy Case study - Shriram Sharma - Reg No 25BCE10524

Respected Sir,

I hope this email finds you well.

I am writing to humbly request a brief extension on the upcoming assignment for Digital Literacy which is due on 31st of March, 2026. Unfortunately, due to technical issues in my system, I might require a little more time to compete the case studies and ensure that my work is of the desired quality.

I expect the issue to be resolved soon and kindly request an extension of two days. I will make sure to submit the assignment by 2nd April 2026.

Thank you for your time and for considering my request.

Yours Faithfully,
Shriram Sharma
First Year Student, CSE,
Registration Number 25BCE10524

Email 2: Internship Inquiry: Expression of interest in a summer internship opportunity

Subject: Inquiry regarding summer internship opportunity- Shriram Sharma

Respected Sir,

I am Shriram Sharma, a second-semester B. Tech student at VIT Bhopal University. I would like to explore the summer internship opportunity with your prestigious company.

I am eager to gain practical experience and enhance my skills in Python. I would appreciate the opportunity to contribute and learn from experienced professionals.

I have attached my resume for your review and would be more than willing if I might get a chance to contribute to your upcoming projects. Please let me know if there are any available opportunities.

Thank you for your consideration.

Sincerely,

Yours Faithfully,
Shriram Sharma

- **Part B –Social Media Do's and Don'ts checklist**

Do's	Don'ts
Do keep your privacy settings updated to control who sees your personal info.	**Don't** post sensitive personal details like your home address or phone number.
Do use a professional profile picture if the platform is used for networking.	Don't become a part of cyberbullying or online harassment.
Do fact-check information before sharing or posting it online	**Don't** use unprofessional language or slang
Do highlight your academic projects and skills to attract recruiters.	**Don't** overshare daily activities on social media
Do use respectful language as that portrays your image online	**Don't** post offensive or discriminatory content
Do use your college email for sign-ups on academic and professional sites.	**Don't** click on suspicious links

Situation Depicting Problems Due To Poor Digital Communication

In today's digital world, we are strangers to each other. However, the only thing that lets the other person know about ourselves is how we communicate. Proper communication is very, very important in today's digital world because that projects who we are.

I have personally experienced how miscommunication in group tasks can create confusion. For example, consider a situation where a group of students is assigned a project using a shared online document. If the team members do not communicate clearly or coordinate properly, it can lead to confusion, unequal workload distribution, and poor performance.

So that is why the allocation of work, real-time monitoring of the work, and also how much each person is supposed to contribute, all those things need to be clearly communicated.

This shows how poor digital communication can negatively affect both academic performance and teamwork.

TASK 5

Cybercrime Awareness Case Study & Prevention

Cybercrime has increased significantly in recent years. Today, people are exposed to different types of online threats like phishing, UPI frauds, Identity theft, and so on.

The Scenario: The "Identity Theft" Trap

Here is a case study of Harish, who was a first-year engineering student. He was very fond of creating blogs and talking about his experiences online. One day, Harish's parents who lived in another city, got a call from an unknown number. When they picked up the call, they saw that it was Harish and he was in a very desperate state, asking for emergency help. The parents panicked and they did whatever Harish was telling them to do. So they did send money to some account as told. However, when they called up Harish, he said no, there was nothing of that sort and then they realized that they have been a victim of identity theft.

Identity theft is a cybercrime in which an attacker steals a person’s personal information, and uses it for fraudulent activities.

How it typically happens (Step-by-Step):

1. A student unknowingly shares personal details, images or videos online
2. The attacker collects sensitive information such as phone number, email ID, students face and voice
3. Using this data, the attacker logs into the student’s bank account, email, or social media profiles.
4. He may create fake accounts or impersonate and request money from contacts
5. The stolen identity is then used for financial fraud, scams, or illegal activities.

‘Stay Safe Online' Checklist

- **Enable Two-Factor Authentication (2FA):** We should always use this on our email to add a second layer of security.
- **Verify the Sender:** Always check the actual email address, not just the "Display Name."
- **Hover Before You Click:** Try to hover the mouse over any link to see the actual destination URL before clicking.
- **Use Strong, Unique Passwords:** It is better to use different passwords for the college portal and personal social media.
- **Avoid Public Wi-Fi for Transactions:** One should never log into our bank or college portal using public Wi-Fi.
- **UPI Safety - PIN is for Sending:** Remember that we only need to enter our UPI PIN to **send** money, never to **receive** it.
- **Verify UPI IDs:** Before approving a payment request, double-check the recipient's name in the UPI app.
- **Report Promptly:** If a scam happens unfortunately, report it immediately at **cybercrime.gov.in** or call the National Helpline at **1930**.

Question: what surprised you most while researching this topic, and one habit you will personally change as a result?

Reflection:

While researching, I was surprised to learn how cybercrime has increased manifold in our times. I realized that identity theft and online fraud are more common than we think, especially among students who frequently use digital platforms. Many people fall victim due to lack of awareness or small mistakes like clicking unknown links, sharing OTPs, personal details, images or videos online.

This task has made me more cautious about my online activities. One habit I will definitely change is that I will verify every link and message before taking action, especially in financial transactions.

Understanding cybercrime is important because it helps us protect our data, money, and identity. This task has improved my awareness and encouraged me to adopt responsible online practices.

Conclusion

This project helped me gain a clear understanding of digital literacy and how it is applied in real life. Through different tasks like creating content, building a digital portfolio, and learning about cyber safety, I was able to develop important digital skills. I learned how to communicate in a professional manner, use online tools more effectively, and be more careful about my digital presence.

These skills will be useful not only during my academic journey but also in my future career. Overall, this project was a meaningful learning experience that improved both my technical knowledge and my confidence in using digital platforms.
